

液壓傳動(含水基油壓)相關之產 品與應用技術

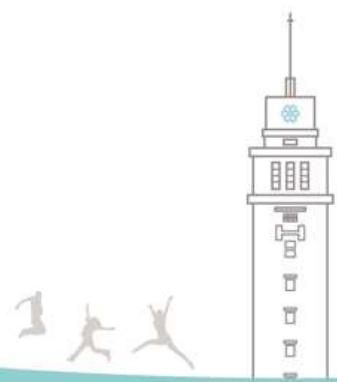

國立雲林科技大學 機械工程系

演講者：鄭秦亦 助理教授

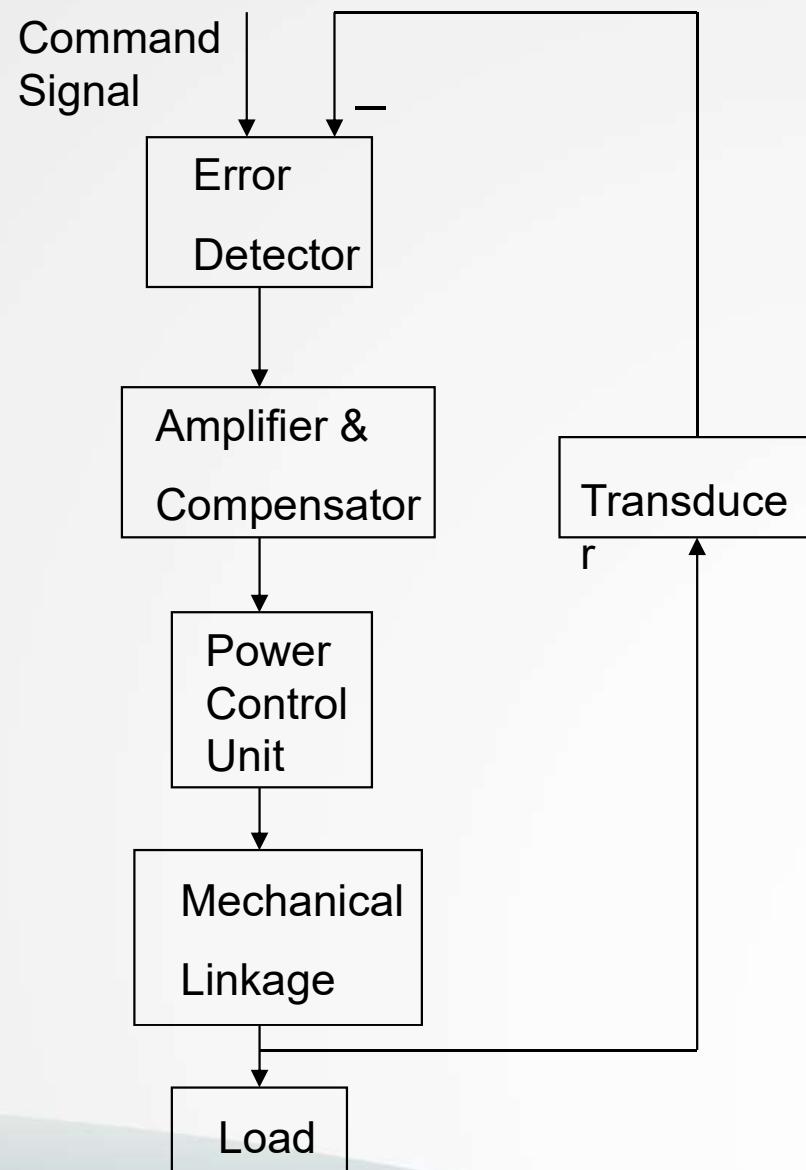

大綱

- 液壓控制原理介紹(Part I)
- 常見液壓元件控制
- 液壓系統整合應用技術說明(Part II)
- 結論

◆ A Typical Automatic Control System

(Figure 1-1)

◆ Advantages of Hydraulic Control

- 輸出功率大，重量輕，體積小；轉矩慣量或力質量比大
- 響應速度快
- 高機械剛度
- 散熱好
- 自潤滑
- 廣泛的速度和力控制
- 高效率
- 長壽

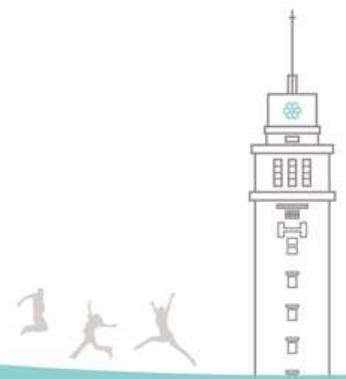

◆ Disadvantages of Hydraulic Control

- 成本高---容許公差小
- 尚不可用---需要額外的電源裝置
- 油污染問題---影響閥門可靠性
- 混亂且需要頻繁換油
- 火災和爆炸危險

◆ Classification of servo-hydraulic systems:

- Electro-hydraulic system
- Mechanical-hydraulic system

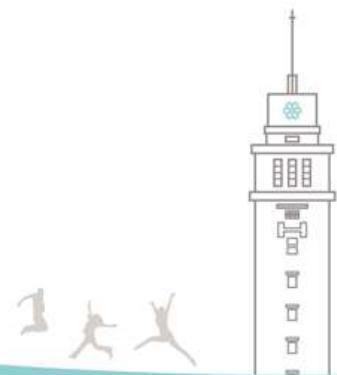

Electro hydraulic control

- 結合了電子信息處理的靈活性和液壓執行器的強大功能

Electro hydraulic servo valve

- 提供電子和液壓之間的接口; 將低功率電平的電信號轉換為高功率驅動
- 以與施加的電信號成比例並在與信號極性對應的方向上控制流向電動機或氣缸的液壓油流量

Actuators

linear(cylinder)

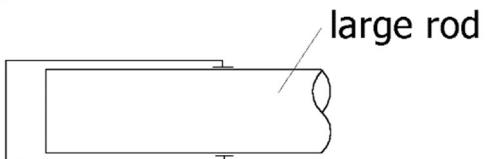

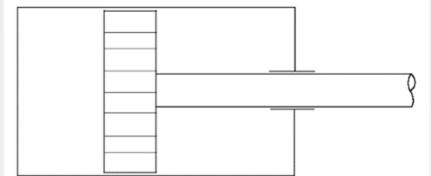

single acting

double acting

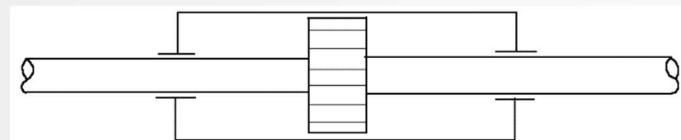

· single acting

1) small rod

2) rams

· double acting

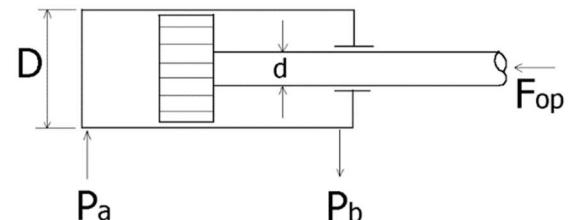

· Telescopic-cylinder

· Limited angle rotary cylinder

§ Design consideration of hydraulic cylinders

1. Output force

$$F_{OP} = F_h - F_b - F_f \pm F_g$$

Where

$$F_h = P_a \cdot \frac{\pi}{4} D^2$$

$$F_b = P_b \cdot \frac{\pi}{4} (D^2 - d^2) \quad (b: \text{back pressure})$$

↑
2~6 bar

F_f : friction force ($\approx \frac{1}{10} F_{op}$)

F_g : gravity of piston and rod

2.Cylinder as a pushing unit

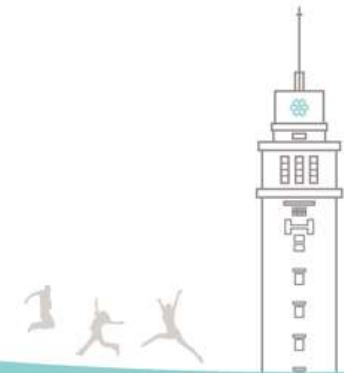

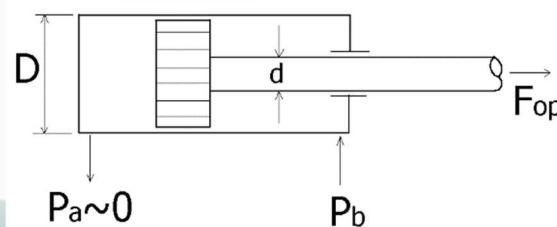

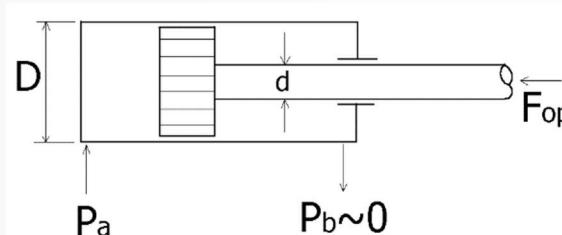

$$\text{effective area} = \frac{\pi D^2}{4}$$

$$\text{thus } D = 1.13 \sqrt{\frac{F_{op}}{P_a}}$$

$$\text{effective area} = \frac{\pi(D^2 - d^2)}{4}$$

3.Cylinder as a pulling unit

$$\text{thus } D = \sqrt{\frac{4F_{op}}{\pi P_b} + d^2}$$

2. **Displacement**

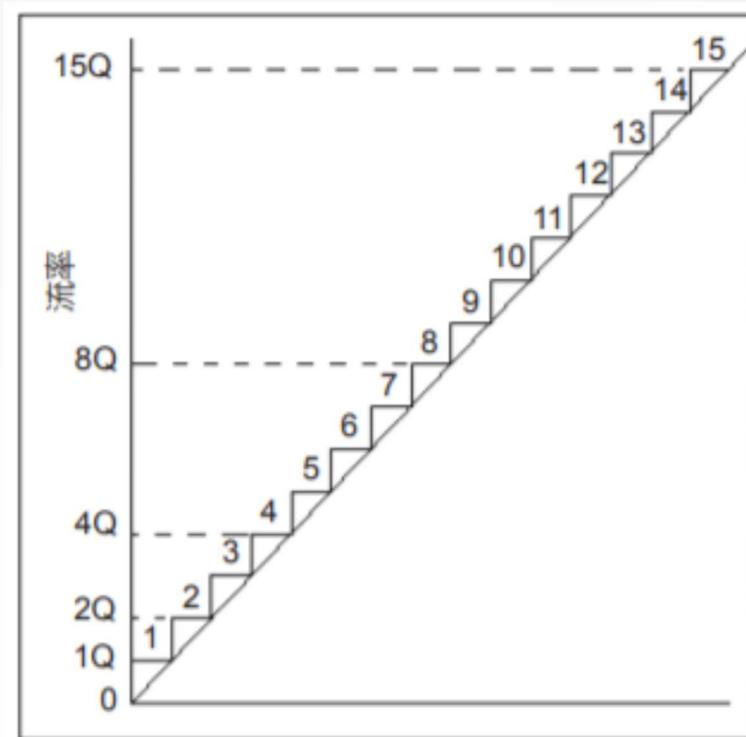

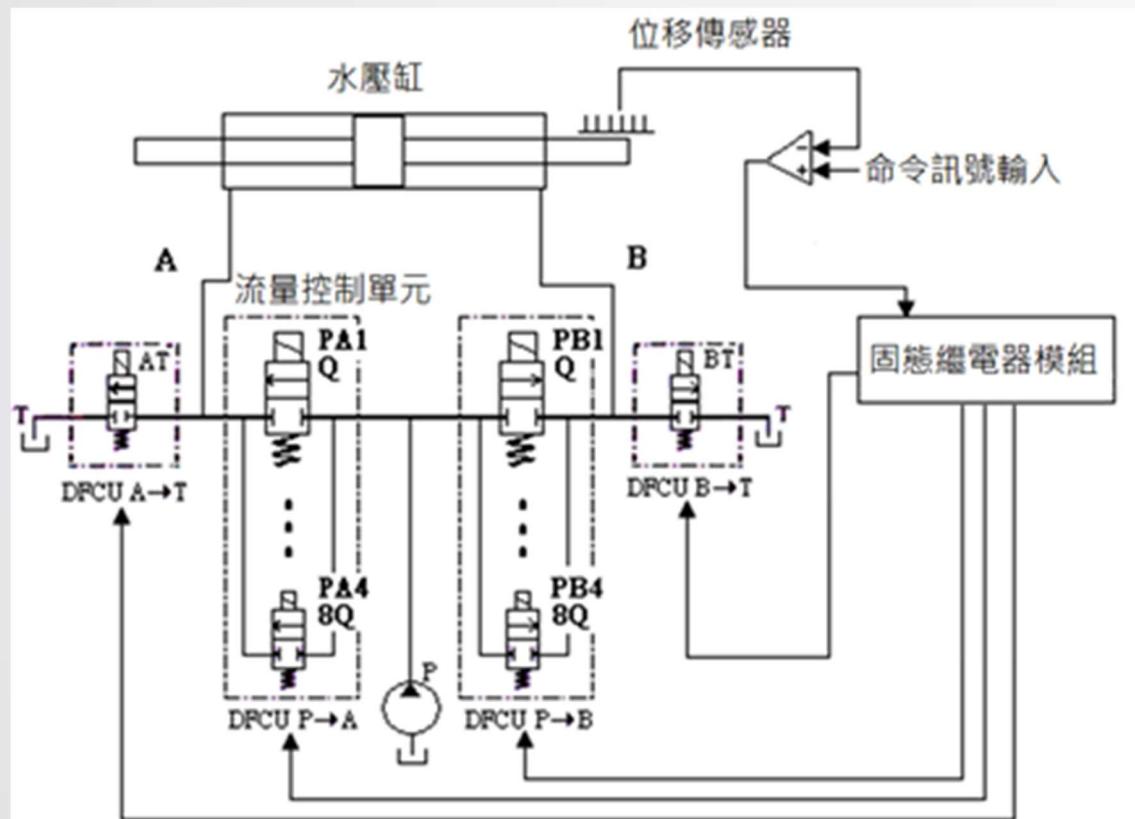

變頻液壓節能系統主要是採用伺服馬達，搭配變頻控制器，依據壓力感測器在不同工作條件下的回饋訊號，進行智慧控制驅動馬達轉速，提供設備實際所需的壓力和流量，並藉此達到最低功耗的節能效益。

七洋變頻液壓系統 節能利器

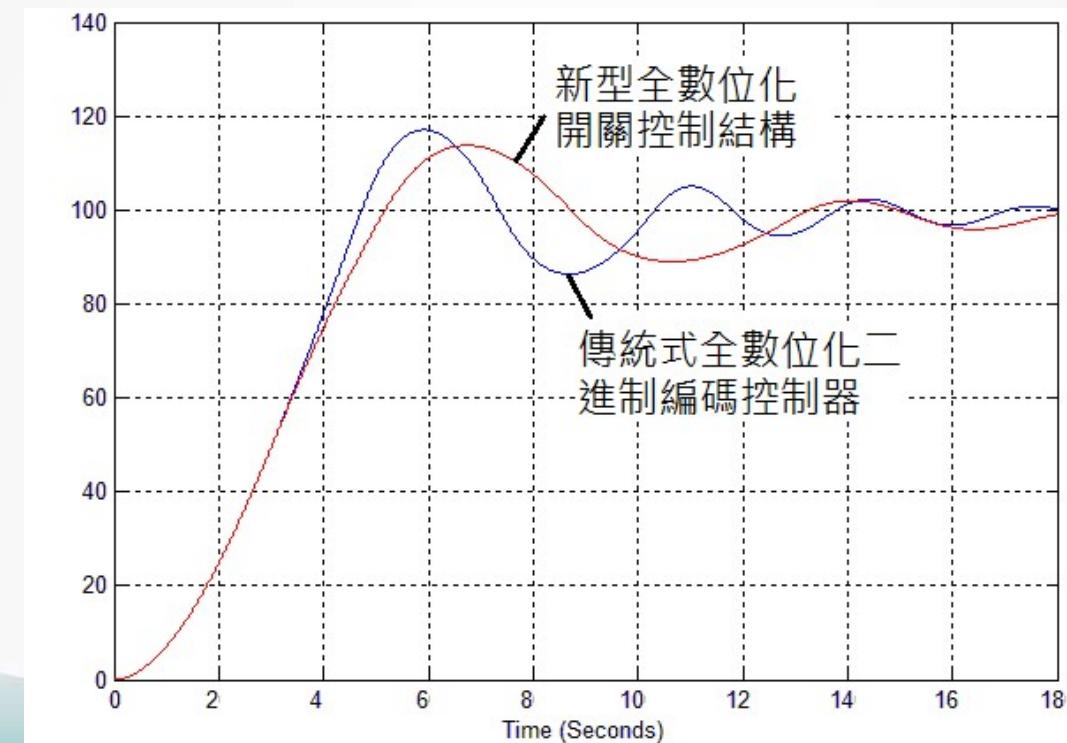

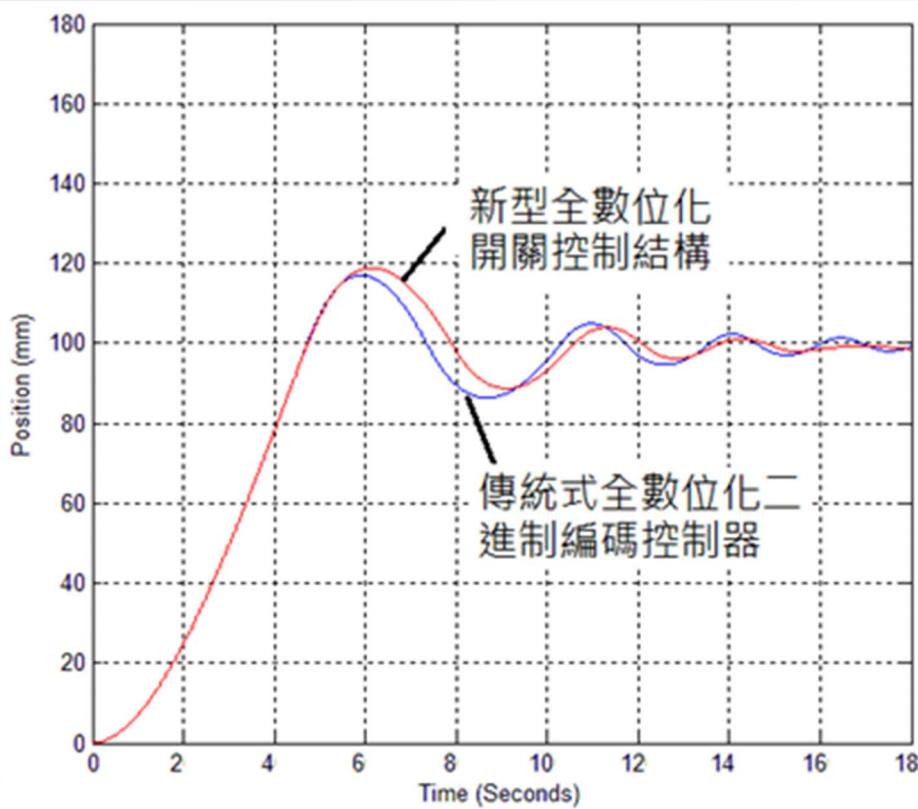

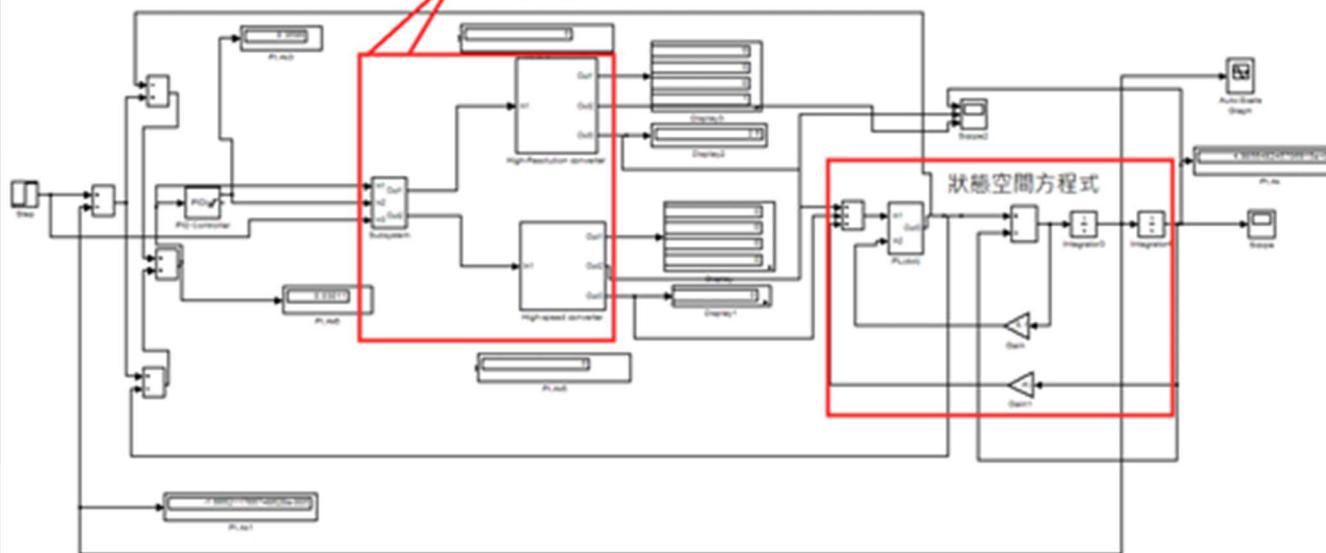

由於目前在水壓控制元件中並無低成本以及大量生產的比例閥或伺服閥，因此本文則採用快速開關閥來組成一套二進制編碼系統之比例流量控制單元(Digital Flow Control Unit; DFCU)並建構一全數位化水壓定位控制系統。

可在手機下載 APP進行體驗

The screenshot shows the Google Play Store interface. The top navigation bar includes the Google Play logo, a search bar, and a magnifying glass icon. Below the navigation is a green header bar with the text "應用程式" (Applications) and a grid icon. To the right of the header are links for "類別" (Category), "首頁" (Home), "熱門排行榜" (Top Charts), and "新品上架" (New Arrivals). On the left side, there's a sidebar with links for "我的應用程式" (My Apps), "購物" (Shopping), "遊戲" (Games), "家庭" (Family), "編輯精選" (Editor's Choice), "帳戶" (Account), "付款方式" (Payment Methods), "Play Points" (with a "最新" (Latest) badge), "我的訂閱內容" (Subscriptions), "兌換" (Redeem), "我的願望清單" (Wish List), and "我的 Play 動態" (Play Activity). The main content area displays the "HBR Augmented Reality" app page. The app icon is a red square containing a white geometric 3D cube. The title "HBR Augmented Reality" is displayed in large text. Below the title is the developer information "PTC Inc. 效率提升" and a rating of "★★★★★ 199". A note indicates "⚠ 你沒有任何裝置。" (Warning: You have no devices). There are two buttons: a green "加入願望清單" (Add to Wish List) button and a green "安裝" (Install) button. Below the app page, there's a preview image showing a book cover for "Harvard Business Review" with the text "INSTRUCTIONS: Take control", "ABOUT", and "WHY EVERY ORGANIZATION NEEDS AUGMENTED REALITY" along with some fine print.

體驗擴增實境

啓動這個互動示範，觀看擴增實境目前的主要能力。

視覺化

擴增實境可呈現單憑肉眼難以看見的特徵或系統。在此，它呈現出液態動力裝置的內部零組件，並提供有關那些零組件情況的資料。

指示和引導

擴增實境可用互動的立體全像圖，帶領使用者走完每一個步驟，取代難以理解的平面指示，像是手冊裡的維修流程。這個擴增實境展示如何更換動力裝置的過濾器。

互動

擴增實境可應用在已經上鉤的

說明結束，歡迎蒞臨 雲科智慧製造研究中心
